What is a 1MWh Containerized ESS?

A 1MWh containerized energy storage system integrates all key components — battery modules, BMS, inverter, and energy management system — within a single movable container. It acts as both a power buffer and a grid stabilizer, storing renewable energy during low.

The energy storage system is essentially a straightforward plug-and-play system which consists of a lithium LiFePO4 battery pack, a lithium solar charge controller, and an inverter for the voltage requested. Price for 1MWH Storage Bank is \$774,800 each plus freight shipping from China. To discuss.

We utilize EVE's safe and reliable LiFePO4 cells, which are 100% brand-new Grade A with original labels and factory QR codes, sourced directly from EVE's factory. Additionally, we collaborate with other leading battery cell brands including REPT BATTERO and Hithium. Support: OEM, ODM Custom 1 MWh.
