

200kW Armenian collapsible container used in subway stations

Overview

At the time of its opening, access to the station was via automated ticket machines. The fare was paid in 5-kopeck coins. After 1991, coins were replaced first by metal and then plastic tokens. In May 2009, new turnstiles from the Kharkiv plant "LOT" were installed, supporting both tokens and plastic cards.

How many underground stations are there in Armenia?

Of the ten stations; seven are underground of which one is a single-vault shallow level, and the rest are pylon deep-level stations. Continuing the tradition of all ex-Soviet underground systems, most of the stations are exquisitely decorated, often blending Armenian national motifs with late-Soviet architecture.

What is a collapsible shipping container?

Shippers are demanding improved efficiencies and sustainability throughout their supply chains. COLLAPSECON is the collapsible shipping container pioneering the future of global trade. It's practical and rigid design saves on space, cost and handling, and helps to significantly reduce industry emissions.

Can collapsible shipping containers be used throughout the supply chain?

According to Nicholas from CEC systems, collapsible shipping containers can be used throughout the entire supply chain. We discuss the logistics issues throughout the supply chain that will be solved through reliable collapsible containers. Imbalanced supply chains result in the need to re-position empty shipping containers around the world.
