The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap. This SRM outlines activities that implement the strategic objectives facilitating safe, beneficial and timely storage deployment;.

WASHINGTON, D.C., April 8, 2025 — Today the American Clean Power Association (ACP) released an Energy Storage Market Reform Roadmap and analysis produced by the Brattle Group, outlining several key reforms that regional grid operators can enact to leverage the unique capabilities of energy storage.

Energy storage technologies can support energy security and climate change goals by providing valuable services in developed and developing energy systems. A systems approach to energy system design will lead to more integrated and optimised energy systems. Energy storage technologies can help to.

The US Department of Energy (DOE) has released its draft Energy Storage Strategy and Roadmap (SRM), a plan providing strategic direction and opportunities to optimise DOE's energy storage investments ahead of the incoming Trump administration. The president-elect has selected oil industry executive.
