

Australia Small Solar Air Conditioner

Overview

Runs automatically between both Solar DC Power and 240V AC Mains. 12000 BTU Performance without costing the earth. As the sun goes down it transitions over to the mains power supply. Comes with a 6 Year Australian Warranty when installed by a certified air conditioner installer.

Runs automatically between both Solar DC Power and 240V AC Mains. 12000 BTU Performance without costing the earth. As the sun goes down it transitions over to the mains power supply. Comes with a 6 Year Australian Warranty when installed by a certified air conditioner installer.

Even when the sun is not shining at all (eg. at night), our ultrahigh efficient heat pumps (A SEER 23 rating without solar and SEER 35 with solar) will keep you comfortable and save you money using far less electricity than a normal A/C or heat pump of the same capacity. What is Solar Air.

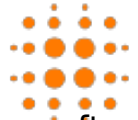

Solar-powered air conditioning offers a smart and energy-efficient cooling solution, allowing you to stay cool with clean, renewable energy. By integrating solar air conditioning into your home, you can reduce reliance on the grid, lower electricity costs, and shrink your carbon footprint—all while.

Solar ACDC's Hybrid Solar Air Conditioning systems offer the best of both worlds: efficient cooling with the flexibility of off-grid and on-grid operation. Designed to leverage solar energy, our hybrid air conditioners ensure comfort while minimizing electricity bills and environmental impact.

Our state of the art solar air conditioners have been designed for low cost, easy installation and fast payback. This unique solar air conditioning technology requires no batteries, no inverter, no controller - just plug in the solar panels and start saving immediately. It even works without mains.

Elevate your living space and enjoy eco-friendly cooling comfort from the only suppliers of air conditioners run solely from solar power. Our quality air conditioners use dedicated photovoltaic solar panels to harness the sun's natural energy so you can forget about grid power, batteries and.

Hands down this is the cheapest-to-run 3.5kW Split System Air Conditioner you can

buy. Video Link Stay Cool or Warm without the huge energy bills. Use it more often without regrets. Pays for itself, in energy savings, within 7-14 months of every day run time. Runs automatically between both Solar.
