

Barbados Solar Container Hybrid

Overview

Should you buy a solar PV system in Barbados?

One of the biggest, if not the biggest hurdle to further solar PV penetration in Barbados is the upfront cost of a system. When you think about the fact that the cost is essentially the prepayment of 25-30 years worth of electricity it makes sense that the price is “high”. If you could purchase a. Continue reading →.

What is the installed solar PV capacity in Barbados?

The total installed solar PV capacity in Barbados is about 22MW (12MW RER + 10MW utility).

Why should Barbados invest in a new energy system?

This innovative solution is expected to ensure the provision of clean, resilient, and stable electricity in Barbados as a key part of the country’s energy transition, leveraging cutting-edge European technology.
