Spike Electric's Arc-Resistant Switchgear is a robust solution for managing high-voltage power in industrial settings. Spike Electric's PowerSafe Arc-Resistant Metal Clad Switchgear represents the forefront of switchgear technology. Incorporating cutting-edge ABB breakers, this system leverages the.

The Custom Switchgear Division at Southwest Electric Company focuses on innovative switchgear solutions to meet your evolving needs. Today, industries are more integrated and require more power from a variety of sources (renewables, utilities, etc.), which creates a need to integrate all of these.

Low Voltage UL891 switchboards and UL1558 switchgear for the industrial and commercial market in NEMA 1, 12, 3R, and 4X designs. Both standard designs and customized solutions with MTM automation and integrated metering are available to fit your individual requirements. Our engineering services.

Point Eight Power offers a full line of low- and medium-voltage arc-resistant switchgear to help combat the over 30,000 arc flash incidents that occur each year - causing thousands of injuries and fatalities. Independently tested by KEMA, our switchgear meets ANSI/IEEE C37.20.7 standards and.

Arc resistant, distribution, generator control, cogeneration, outdoor, load interrupter fusible, dielectric, and insulated switchgears are available. Some products are available in 5 to 38 kV, 110 to 150 kV basic insulation level (BIL), 630 A continuous and load break current, 600 V, and 4,000 to.

Offering an industry-leading, low-profile design that is Type 2C (2BC) compliant,

nVent arc-resistant switchgear options meet or exceed IEEE, ANSI and NEMA requirements. Available in a wide range of ANSI ratings and configurations, our switchgear features utility-grade, welded, metal-clad assembly.
