

Boston Energy Storage Container Hybrid Government Procurement

Overview

The commonwealth has issued a draft request for proposals (RFP) for 1.5 GW of batteries with four- to 10-hour storage capacity, primarily funded through the state's Clean Peak Standard (CPS). The tender is part of a broader effort to procure 5 GW of energy storage by 2030.

The commonwealth has issued a draft request for proposals (RFP) for 1.5 GW of batteries with four- to 10-hour storage capacity, primarily funded through the state's Clean Peak Standard (CPS). The tender is part of a broader effort to procure 5 GW of energy storage by 2030.

This initial RFP follows the state's 2024 legislation mandating the procurement of 5 GW of storage capacity by 2030. The exact release date for the Long-Term Contracts for Energy Storage Projects remains "TBD," though a tentative schedule in the draft suggests a public release of the RFP on July.

Massachusetts's first " Section 83E " procurement for energy storage is underway, with bids due Wednesday, September 10, 2025, at noon. As we've previously discussed, Governor Maura Healy last year signed into law sweeping clean energy legislation that established a new procurement for energy.

On May 5th, the Massachusetts Department of Energy (DOER), in collaboration with the state's electric distribution companies (i.e. utilities), announced the launch date for the first in a series of long-anticipated solicitations for grid-scale energy storage. The RFP will open on July 31, 2025, and.

The state has unveiled a draft request for proposals (RFP) for the procurement of approximately 1.5 gigawatts (GW) of mid-duration batteries with up to 10 hours of storage capacity. Administered by the state Department of Energy Resources (DOER), eligible applicants may apply for state funding to.

Massachusetts recently stepped closer to its first major solicitation for long-term energy storage contracts under its new Section 83E authority. On May 5, the MA Department of Energy Resources (DOER), in partnership with the state's electric distribution companies (EDCs), jointly filed a draft.

The commonwealth has issued a draft request for proposals (RFP) for 1.5 GW of

batteries with four- to 10-hour storage capacity, primarily funded through the state's Clean Peak Standard (CPS). The tender is part of a broader effort to procure 5 GW of energy storage by 2030. Massachusetts is. What is Massachusetts' energy storage procurement?

The energy storage procurement aligns with Massachusetts' 2024 legislation, An Act Promoting a Clean Energy Grid, Advancing Equity and Protecting Ratepayers, which directs the state to procure energy storage totaling 5 GW by July 31, 2030. The procurement targets 3.5 GW of mid-duration storage (four to ten hours), totaling 14,000 to 35,000 MWh.

How many energy storage projects are there in Massachusetts?

"Power Advisory notes that there are over 60 energy storage projects that are 40 MW or larger proposing to interconnect in Massachusetts offering almost 13,000 MW that have Feasibility Studies, System Impact Studies, Facilities Studies, or Interconnection Agreements," the firm, Power Advisory, wrote in its May report.

How many MWh of energy storage will Massachusetts have in 2025?

The current law expands upon the 2018 goal of deploying 1,000 MWh of storage by Dec. 2025. As of Feb. 15, 2025, Massachusetts utilities reported "644 MWh of installed energy storage with an additional 12,932 MWh of storage in the pipeline." When will long-term contracts for energy storage projects be released?

The exact release date for the Long-Term Contracts for Energy Storage Projects remains "TBD," though a tentative schedule in the draft suggests a public release of the RFP on July 31, 2025. The RFP includes scheduled periods for questions and feedback through the fall, with proposal submissions due by Sept. 10.
