

Capacity 60kW grid-connected inverter model parameters

Overview

PV array input power [kWp] Max. PV input voltage [V] Max. PV input current per MPPT [A] Max. AC output apparent power [kVA] Max. AC output current [A]* X3
MEGA G2 60kW on-grid inverter offers 98.4% efficiency, up to 150% PV oversizing, and advanced smart features for.

PV array input power [kWp] Max. PV input voltage [V] Max. PV input current per MPPT [A] Max. AC output apparent power [kVA] Max. AC output current [A]* X3
MEGA G2 60kW on-grid inverter offers 98.4% efficiency, up to 150% PV oversizing, and advanced smart features for.

Ordering guidelines: Determine the basic model and add your desired features from above. Ex: S5-GC60K-LV-US-APST (Inverter with APS transmitter) .

S5-GC60K-LV-US string inverters are suitable for three-phase commercial rooftop PV projects with grid voltage of 240 or 208VAC. Both string inverters have high input currents, which enable support of larger PV modules without compatibility issues, better supporting power density and flexibility.

GoodWe SMT 50-60kW Series inverter is ideal for medium and large-scale commercial installations. Harvest solar energy and generate environmental-friendly power for increased return on investment brought by high yields with your commercial PV system. Its unique fuse-free design makes it.

Canadian Solar's grid-tied, transformer-less string inverters help to accelerate the use of three-phase string architecture for commercial rooftop and small ground-mount applications. An NRTL approved, cost-effective alternative to central inverters, these inverters are modular design building.

The 50 & 60kW (55 & 66kVA) medium power CPS three phase string inverters are designed for ground mount, rooftop and carport applications. The units are high performance, advanced and reliable inverters designed specifically for the North American environment and grid. High efficiency at 98.8% peak.
