

Cape Verde s new energy storage industry

Overview

Announced earlier this week (8 December), AFC and Cabeolica have officially opened the Cabeolica Wind Farm and Battery Energy Storage System (BESS) project, which comprises an expansion to an existing wind farm and three separate BESS installations on four of Cape Verde's 10 islands.

Announced earlier this week (8 December), AFC and Cabeolica have officially opened the Cabeolica Wind Farm and Battery Energy Storage System (BESS) project, which comprises an expansion to an existing wind farm and three separate BESS installations on four of Cape Verde's 10 islands.

Africa Finance Corporation (AFC) and public-private-partnership (PPP) Cabeolica have inaugurated 13.5MW of wind power generation and 26MWh of battery storage in the Republic of Cabo Verde (Cape Verde). Announced earlier this week (8 December), AFC and Cabeolica have officially opened the Cabeolica.

Cape Verde inaugurated new wind and battery storage installations on Monday as part of the expansion of its Cabeólica renewable energy project, backed by more than 39 million euros in financing from the European Investment Bank (EIB). The funding was arranged by EIB Global, the bank's development.

The Santiago Pumped Storage Project, which will be located in Chã Gonçalves, in the municipality of Ribeira Grande de Santiago and will cost around 60 million euros, promises to significantly increase energy storage capacity, thus making it possible to increase the country's electricity production.

During the presentation of the project, Cape Verde's National Director for Industry, Trade and Energy, Rito Moreira, announced that the energy storage centre is scheduled to be operational by 2030, with the aim of injecting 7% of renewable energy into the national public grid and 18% into that.

That's Cape Verde —a nation racing to swap fossil fuels for renewables. Enter the energy storage cabin, the unsung hero bridging green energy dreams with reality. Let's unpack how this tech works and why it's a game-changer for islands worldwide. Who's Reading This?

(Spoiler: It's Not Just.

Well, Cape Verde's new energy storage container factory might just hold the blueprint for solving both challenges simultaneously. Specializing in battery energy storage systems (BESS) within shipping container frameworks, this facility represents Africa's first vertically integrated manufacturing.
