Most DIYers and professionals start their tool journey with a twin pack—usually a drill, a charger, and a couple of batteries. Over time, they invest in more tools from the same brand to ensure battery compatibility. Before long, they're hundreds of dollars deep into a single ecosystem. But what if.

Batteries can be charged manually with a power supply featuring user-adjustable voltage and current limiting. I stress manual because charging needs the know-how and can never be left unattended; charge termination is not automated.

Because of difficulties in detecting full charge with nickel-based.
