Over the past five years, China has built the world's largest and most extensive 5G network infrastructure. The country had about 4.71 million 5G base stations by the end of September, amid efforts to strengthen its cyber infrastructure. The figure represents a net increase of 455,000 from the end.

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

China unveils the world's first military-grade mobile 5G base station, developed by China Mobile Communications Group and the PLA, designed for battlefield use to enable seamless communication for up to 10,000 military robots and drones within a 3-kilometer radius. The system offers high-speed.

During the 2023 China Computational Power Conference held in Yinchuan, Ningxia, Song Qizhu, Chairman of China Broadcasting Network, stated in his keynote speech that under the guidance and coordination of the Ministry of Industry and Information Technology, the broadcasting and television (BTV) 5G.

Chinese mobile operators added 235,000 5G base stations in the first five months

of 2025, taking their combined total to nearly 4.5 million, data from the Ministry of Industry and Information Technology showed. The total 5G deployments accounted for 35.3 per cent of all base stations in the.
