Circuit breakers are one of the most important electrical safety devices used in homes, offices, and industries. They protect electrical systems by automatically cutting off power when there is an overload or short circuit. Without them, electrical fires, damage to appliances, and electric shocks.

MCBs or miniature circuit breakers are a type of switch used to automatically turn off electrical circuits during abnormal conditions. They are reliable sensitive and resettable. Miniature circuit breakers are designed to protect electric circuits from overcurrent. Mounted on DIN rail / omega rail.
