It's why thousands of American farms & ranches trust RPS. Rather a Friendly Voice?

Our famous support team is here to help. It's a QUICK 10 minute phone call! COMPLETE SET UP! RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows.

Container farms are vertical farming systems that use modified shipping containers for growing food inside without the need for power, water, sunlight or nutrients. Essentially, the container protects a controlled environment (CEA) that is ideal for growing crops, providing a solution for.

A solar container for agriculture gives you steady solar power where you need it. It is easy to move and use. Many farms pay a lot for fuel and have power problems. A solar container lets you make clean energy on your farm. This helps the environment and saves you money. In Kenya, one farm used.

Shipping containers are often used as remote offices, workshops or data shelters on construction sites, farms, and emergency zones. When the grid is hundreds of feet away (or non-existent), a self-contained power solution is ideal. For instance, specialized units like the LZY-MSC1 Sliding Mobile.

Container farming is a vertical farming system that uses modified shipping containers for growing food inside without the need for power, water, sunlight or nutrients. Essentially, the container protects a controlled environment that is ideal for growing crops, providing a solution for sustainable.

Our vertical hydroponic farm solutions maximize growing space while minimizing

energy and water usage. Using patented vertical farming technology, our ultra-efficient farms transport easily, can be stacked and are solar capable. Join us in decentralizing agriculture and reducing carbon emissions.
