We have the country's strongest program in generator systems and emergency power systems, and we supply emergency power from 8 kVA to several 1000 kVA for backup in the event of power failure. We offer a large selection of standard systems and build special systems adapted to the current need. All.

Container generators are walk-in emergency power systems that are generally used as flexible, movable substitute power sources. They are however planned and realised as permanent systems. Depending on requirements, we use mineral wool of between 50 and 100 mm to provide noise and heat insulation in.

With the unique mobile hybrid temporary power solution from HybridGenerator you save up 90% in your diesel consumption, CO<sub>2</sub> footprint and related costs for service and logistics. There are no excuses for not changing to this system if you are economical and want to have a greener profile. Explore.

Identify and compare relevant B2B manufacturers, suppliers and retailers Max. DEIF offers a comprehensive control package for mobile generators, ideal for short-term rentals, which ensures safe and reliable management of generator fleets. The package includes essential components like the AGC 150.

DC-Supply A/S - Danish Container Supply delivered four customised 10ft containers

to Dantherm Power in Hobro. The containers were designed for generator supply, and were created in close cooperation with Dantherm Power. The container solution had to cover Dantherm Power's specific needs in the form.
