

Energy Storage Power Station Notice

Overview

How long has the PSC been working on an energy storage plan?

Efforts towards a finalized implementation plan have been ongoing since June 2024, when Governor Hochul first announced that the PSC had approved an Energy Storage Roadmap in furtherance of the state's goal to achieve six gigawatts ("GWs") of energy storage by 2030.

What does the 2024 energy storage order mean for NYSERDA?

The 2024 Energy Storage Order established a statewide goal of deploying 3,000 MW of new bulk energy storage by 2030 and required that NYSERDA submit a draft Implementation Plan that outlines the methods and budget that could be used to achieve the bulk energy storage deployment target.

Why did the PSC approve energy storage programs in 2024?

The PSC's subsequent 2024 Energy Storage Order approved the energy storage programs described in the Roadmap in order to achieve a total of 4,700 megawatts ("MWs") of incremental installed capacity of energy storage spanning the bulk, retail, and residential sectors.

What is New York state's energy storage plan?

New York State aims to reach 1,500 MW of energy storage by 2025 and 6,000 MW by 2030. Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities and Low-to-Moderate Income New Yorkers.
