

Energy storage project settled in Argentina

Overview

Argentina has successfully concluded its first battery energy storage tender, awarding 667 MW of capacity – around 30% more than the originally planned 500 MW – due to strong industry interest and competitive pricing.

Argentina has successfully concluded its first battery energy storage tender, awarding 667 MW of capacity – around 30% more than the originally planned 500 MW – due to strong industry interest and competitive pricing.

Argentina's government said on Monday it has awarded contracts for 667 MW of capacity in its first tender dedicated to battery energy storage systems (BESS), exceeding its original 500-MW target by about 30%. Energy storage battery. Photo by Anna Vasileva These projects will be installed in.

In addition to awarding 30% more capacity than originally planned, Argentina's first battery energy storage tender could allocate an additional 222 MW to bidders willing to match the highest awarded price. Argentina has successfully concluded its first battery energy storage tender, awarding 667 MW.

The first large-scale battery energy storage tender in Argentina is catching the attention of the international community as an unequivocal step towards modernizing power infrastructure. Intended to strengthen the grid in the greater Buenos Aires region, the program has attracted a lot of.

Argentina has taken a decisive step toward modernising its electricity infrastructure with the conclusion of its first large-scale battery energy storage tender, awarding 667 MW of capacity—a significant 30% above the original 500 MW target. The competitive bidding round, part of the Alma-GBA.

Argentina has concluded its first battery energy storage (BESS) tender, awarding 667 MW of projects—well above the 500 MW target—after receiving bids totaling 1,347 MW from 15 companies. The selected projects, representing over US\$540 million in investment, will be installed in the Buenos Aires.

Over 667 megawatts of energy storage capacity are headed for the Buenos Aires Metropolitan Area (AMBA), representing an investment exceeding half a billion US dollars. This isn't just about avoiding summer blackouts; it's a pivotal moment for

Argentina's energy future, and a potential model for. How many MW of battery energy storage in Argentina?

Argentina's government said on Monday it has awarded contracts for 667 MW of capacity in its first tender dedicated to battery energy storage systems (BESS), exceeding its original 500-MW target by about 30%. Energy storage battery. Photo by Anna Vasileva.

Will Argentina integrate new electricity storage infrastructure into urban distribution networks?

This national and international open call, part of Resolution SE 67/2025, marks Argentina's first large-scale effort to integrate new electricity storage infrastructure into urban distribution networks.

Can battery energy storage modernize the grid in Argentina?

The. Argentina's ambitious push toward grid modernization through battery energy storage has received an enthusiastic response, with CAMMESA (Compañía Administradora del Mercado Mayorista Eléctrico) confirming the submission of 27 project proposals from 15 companies under its AlmaGBA program.

Why is Argentina planning to expand its electricity transmission network?

Argentina is simultaneously planning over \$1 billion in investments to expand its electricity transmission network, a project vital for reinforcing supply and accommodating future growth. This dual approach – storage for immediate resilience and transmission upgrades for long-term capacity – is a smart strategy.

Energy storage project settled in Argentina

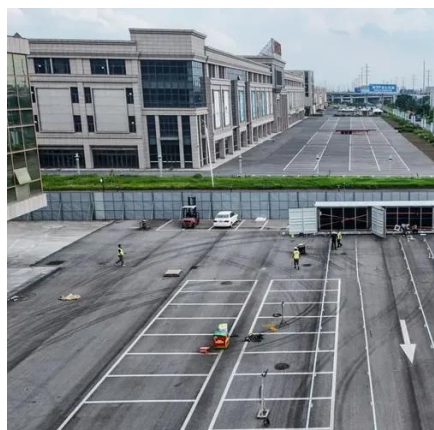

[Argentina's Oversubscribed Energy Storage Tender Signals](#)

Argentina's 1.3 GW battery storage tender marks a transformative leap toward grid resilience and clean energy leadership in Latin America.

[Argentina awards 667 MW in inaugural battery storage tender](#)

Argentina has successfully concluded its first battery energy storage tender, awarding 667 MW of capacity - around 30% more than the originally planned 500 MW - due ...

[Argentina awards 667 MW in first battery storage tender](#)

Argentina has concluded its first battery energy storage (BESS) tender, awarding 667 MW of projects--well above the 500 MW target--after receiving bids totaling 1,347 MW ...
