

Foreign media solar inverter

Overview

An unidentified illegal communication device has been found in Chinese solar inverters, prompting U.S. energy authorities to reevaluate security risks for renewable energy infrastructure.

An unidentified illegal communication device has been found in Chinese solar inverters, prompting U.S. energy authorities to reevaluate security risks for renewable energy infrastructure.

Over the past nine months, unexplained communication equipment has been found inside Chinese power inverters used to connect solar panels and wind turbines to electricity grids. The undocumented components were also found in heat pumps, electric vehicle chargers, cellular radios, and in batteries.

U.S. energy officials have intensified scrutiny of Chinese-manufactured components in renewable energy infrastructure after the identification of undocumented communication devices embedded in power inverters, according to sources familiar with the ongoing investigation. Power inverters-essential.

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication devices inside certain solar inverters. A Reuters investigation, citing two individuals familiar with the matter, revealed.

On May 14, 2025, U.S. energy officials began investigating Chinese-made solar power inverters after discovering undocumented communication devices, including cellular radios, inside some units, according to Reuters. These inverters, critical for connecting solar panels to the U.S. electricity grid.

An unidentified illegal communication device has been found in Chinese solar inverters, prompting U.S. energy authorities to reevaluate security risks for renewable energy infrastructure. On the 14th, Reuters quoted a U.S. energy official as saying, 'An unidentified communication device was found.'

LONDON (Reuters) -U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication equipment was found inside some of them, two

people familiar with the matter said. Power inverters, which are.

Foreign media solar inverter

AFN

Unfortunately, undocumented communication devices have been recovered in a multitude of different Chinese-manufactured batteries and solar power inverters that bypass ...

Rogue communication devices found in Chinese solar power inverters

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained ...

[Security Concerns Over Chinese-Made Solar Inverters](#)

Recent revelations concerning Chinese-manufactured solar power inverters have raised significant security concerns following the discovery of potentially harmful ...

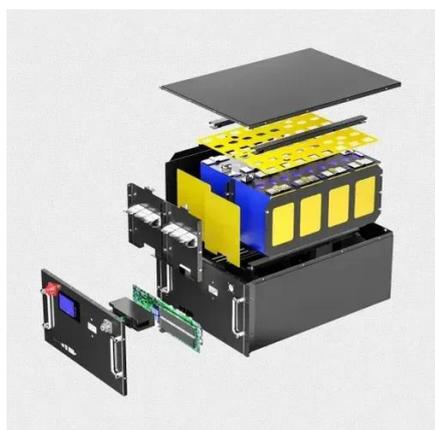

U.S. discovers illegal devices in Chinese solar inverters, raising

An unidentified illegal communication device has been found in Chinese solar inverters, prompting U.S. energy authorities to reevaluate security risks for renewable energy ...

Chinese Made Solar Power Inverters Connected To US Power ...

In a plot twist worthy of a techno-thriller, U.S. energy officials have uncovered rogue communication devices embedded within Chinese-manufactured solar power inverters.

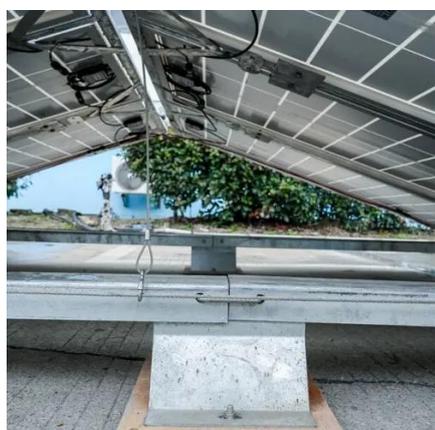

U.S. Authorities Investigate Communication Devices in Solar Power Inverters

U.S. energy officials have intensified scrutiny of Chinese-manufactured components in renewable energy infrastructure after the identification of undocumented ...
