This guide will walk you through all the major solar incentives, tax credits, and other beneficial policies available to Georgia residents in 2025. We'll clarify how each program works, who's eligible, and how they contribute to your solar investment.

The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system, including all the equipment, labor, permitting, and sales tax, qualifies for the ITC. However, this credit will no longer be.

An Executive Order issued on July 7, 2025 directed the Secretary of Treasury to issue new and revised guidance within 45 days "to ensure that policies concerning the 'beginning of construction' are not circumvented, including by preventing the artificial acceleration or manipulation of eligibility.

According to Georgia Power, "the potential for solar energy use in Georgia is dependent upon the amount of sun shining on the earth's surface." And there are multiple things that affect the amount of sun including the weather, haze and the level of moisture in the air. It is possible to have solar.

Also known as the solar tax credit, the Residential Clean Energy Credit allows renewable energy system owners to claim a tax credit of 30% of the cost of going solar. Originally enacted in 2005, the solar tax credit was extended by the Inflation Reduction Act (IRA) in 2022. With the passing of the.

A Renewable Energy Credit (REC) is generated for every 1MWh of energy produced from renewable energy sources. 2. You purchase the RECs Every month you'll receive a certificate for the value of RECs purchased through one of our solar programs. 3. You claim the renewable energy We retire the RECs on.

Georgia offers renewable energy and energy efficiency incentive programs, which

are available for residential customers, small and large businesses, and government agencies, to improve the environment and stimulate sustainable economic development and growth. Georgia created the Solar Easements Act. How much does a 5 kW solar panel cost in Georgia?

In Georgia, the average cost for a 5 kW solar panel system is around \$13,160. Once you factor in the 30% credit, the cost of a solar panel system in Georgia comes down to \$9,212. When you file your taxes, you can claim this incentive as a credit towards your federal tax bill.

What is the best solar incentive in Georgia?

The best solar incentive in Georgia is actually a federal tax credit. The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system, including all the equipment, labor, permitting, and sales tax, qualifies for the ITC.

How much does a solar system cost in Georgia?

The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system, including all the equipment, labor, permitting, and sales tax, qualifies for the ITC. In Georgia, the average cost for a 5 kW solar panel system is around \$13,160.

Does Georgia have a solar rebate program?

As of January, Georgia doesn't have any local incentives or rebate programs. However, Georgia Power will buy back the excess energy a solar panel system creates at a rate less than the retail cost of energy.
