

Georgia solar module price

Overview

As of December 2025, the average solar panel system costs \$2.46/W including installation in Georgia. For a 13.14 kW system (the average system size in Georgia), this comes out to about \$32,346 before any available incentives, though prices range from \$27,494 to \$37,198.

As of December 2025, the average solar panel system costs \$2.46/W including installation in Georgia. For a 13.14 kW system (the average system size in Georgia), this comes out to about \$32,346 before any available incentives, though prices range from \$27,494 to \$37,198.

You'll pay an average of \$32,346 to install a 13.14 kilowatt (kW) solar panel system in Georgia before any available incentives. Solar panels typically last 25-30 years, generating free electricity and protecting you from rising utility rates for decades. The average Georgia homeowner will save.

For homeowners in Georgia, the average cost for a professionally installed residential rooftop solar system typically ranges from \$14,000 to \$26,000 before any tax credits or incentives are applied. This guide will provide a comprehensive breakdown of what that investment includes, the key factors.

As of 2026, the average cost of solar panels in Georgia is \$3.06 per watt, making a typical 7.2 kilowatt (kW) solar system \$3.06 after claiming the 30% federal solar tax credit now available. This is just about the average price of residential solar power systems across the United States, which is.

You'll spend an average of \$12,635 on a 5 kW system in Georgia, after tax incentives. For Georgia, you can use \$3.52 per watt to determine the price of a larger system (system size x price per watt x 0.7 to account for tax incentives).
High Power Bills?

How long does it take to see a return on your.

Average solar panel installation costs range from \$8,875 to \$25,357 in Georgia. How much you actually spend depends on the size of your system, what incentives you're eligible for and other factors. Based on feedback from several solar customers in Georgia, the general consensus is that solar panel.

The baseline cost for a solar panel system in Georgia is measured by the price per watt, which generally falls between \$2.54 and \$3.52 before any incentives are applied. This cost per watt is slightly higher than the national average in some reports, though other reports indicate it is slightly.
