

# Government energy storage marries new energy

## Overview

---

Will New York double its energy storage goal in 2022?

Hochul announced plans in January 2022 to double New York's previous energy storage goal of 3 GW by 2030. The state released a draft road map in December 2022 showing how it would achieve its new target, including a centralized procurement mechanism to expedite solicitations and deployments.

What is the northern New York energy storage project?

"The completion of the Northern New York Energy Storage project marks an important step to reaching New York's energy storage and climate goals." The project, located in Chateaugay, about 40 miles northwest of Plattsburgh, is the Power Authority's first utility-scale battery project and the first one built by New York State.

How does the federal government support energy storage technology?

The federal government has driven the technical development of energy storage technologies and incentivized developers through financial support of early demonstration projects, improving market rules, and a series of grant programs.

Does New York have a bulk energy storage program?

The New York State Energy Research and Development Authority filed with the New York Public Service Commission a proposed bulk energy storage program implementation plan designed to support the state's build-out of storage deployments to meet the stated goal and to reduce projected costs by nearly \$2 billion.
