Simply put, a grid-tie inverter converts direct current (DC) into alternating current (AC) suitable for injecting into an electrical power grid, normally 120 V RMS at 60 Hz or 240 V RMS at 50 Hz. Grid-tie inverters are used between local electrical power generators: solar panels, wind turbines.

This is a Full Energy Storage System for grid-tied homes. The EverVolt storage system comes with a hybrid inverter and modular batteries. The inverter can connect to a PV input of up to 6.5 kW DC over two MPPT channels and is available in both AC and DC coupled options. The upcoming new generation.
