A circuit breaker is a critical safety device in electrical systems, designed to protect circuits from damage caused by overloads, short circuits, or ground faults. In Russia and across the CIS region, various types of circuit breakers are used in residential, commercial, and industrial.

Aira Trex Solutions India Pvt Ltd is the best providers of Circuit Breakers in Moscow. The items that you get from our company are tested before reaching your industrial locations. This means that you are getting the items that are thoroughly testified for their excellence so that there are no.

This is designed to draw your attention to safety features which exceed international standards. We are introducing new ACB generation with the solutions from 800A to 6300A to suit any application. The ultimate in compactness and operational capability. All models have a short-time withstand rating.

Inductotherm Group Russia is the most comprehensive resource in the region for thermal processing equipment and systems. As a member of the global, 40-company Inductotherm Group, we offer it all: induction melting equipment; vacuum induction melting; induction heating and all types of heat.

KLIXON® thermal circuit breakers are compact, lightweight, protective devices designed to repeatedly interrupt short circuits or extended overloads in applications which require precise, dependable operation plus high resistance to shock and vibration. KLIXON® thermal circuit breakers are compact.
