

# Home power outage emergency energy storage

## Overview

---

During daytime outages, panels directly power your home while simultaneously replenishing batteries—enabling indefinite operation in sunny conditions. This eliminates generator fuel anxiety and supply chain vulnerabilities.

Powerwall is a compact home battery that stores energy generated by solar or from the grid. You can then use your stored energy to power the devices and appliances in your home day and night, during outages or when you want to go off-grid. With customizable power modes, you can optimize your stored.

Beyond emergency power, they represent energy independence during our increasingly unpredictable climate reality. Battery capacity, measured in kilowatt-hours (kWh), forms the foundation of outage protection—but it's not a simple equation. A 10kWh battery might run essentials for 12 hours or a full.
