What is a solar inverter?

Inverters convert direct current (DC) electricity produced by solar panels into a sinusoidal alternating current (AC) of 220V, which is suitable for most electrical appliances. The assortment of inverters for solar systems on the market today is huge.

What are the different types of solar inverters?

The other popular type of inverter for solar panels is the central inverter. It functions similarly to a string solar inverter, but bigger and can handle several strings. They are used in commercial solar systems, where a lot of solar power has to be converted.
