

How low will the price of solar modules drop

Overview

Why did solar panels cost lower in 2024?

EnergySage said the lower quoted installation prices largely came from lower equipment costs. Wood Mackenzie reported solar panel prices dropped 30% year-over-year in 2024. Prices may have also lowered due to softened demand, said EnergySage. Residential solar installations declined 31% in 2024.

Are residential solar prices falling?

Residential solar prices are falling lower than ever before, said marketplace operator EnergySage in its biannual solar and storage marketplace report. The median quoted price on its platform reached \$2.50 per watt in the second half of 2024, falling 6.4% from the first half of 2024.

How much does a solar system cost in 2024?

The median price for solar-only systems dropped to \$2.65 per watt in the second half of 2024, down from \$2.80 per watt earlier in the year. That's the lowest price EnergySage has recorded. Battery-backed systems saw an even bigger price drop: home solar + storage quotes fell from \$2.59 per watt in H1 2024 to \$2.40 per watt in H2 2024.

Are solar & storage prices going down in 2024?

According to EnergySage's new Solar & Storage Marketplace Report, prices for both home solar and solar + storage reached record lows in the second half of 2024. EnergySage, an online solar shopping marketplace (and Electrek affiliate) analyzed millions of quotes from installers across the US in its 20th semiannual report.

How low will the price of solar modules drop

[Solar module prices on a clear downward trend](#)
