

How much does a solar panel cost per meter

Overview

On average, solar panels can cost anywhere between \$100 and \$300 per meter, depending on quality and technology. Prices may vary significantly based on brand reputation and geographical location, with additional expenses from installation and maintenance also impacting total.

On average, solar panels can cost anywhere between \$100 and \$300 per meter, depending on quality and technology. Prices may vary significantly based on brand reputation and geographical location, with additional expenses from installation and maintenance also impacting total.

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of Energy.

How much do solar panels cost on average?

As of 2026, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). The total price depends.

If you own a 2,000-square-foot house, expect to pay around \$29,000 for a complete solar system before tax credits, or about \$20,300 after taking the federal tax credit. How big your home is and how much electricity you use are the main things affecting your cost. A small 1,000-square-foot condo.

Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

In general, the expense for one meter of solar panels can range significantly based on several factors, including quality, brand, and type. For instance, common photovoltaic panels may cost between \$100 and \$300 per meter. 2. Installation fees, geographical location, and incentive programs can.

Solar panels cost \$3.00 to \$4.50 per watt installed on average, with homeowners spending about \$3.75 per watt before factoring in available solar incentives. A 6- to 10-kW solar panel installation costs \$12,600 to \$31,500 after the 30% federal tax credit. Solar panel prices depend on the size.
