The battery can store the extra energy produced from solar panels during the day to avoid using electricity at a more expensive rate. The peak time-of-use (TOU) rates can be double the price compared to off-peak rates. In such a scenario, a solar battery storage system can come in handy for using.

As of recent data, the average cost of a BESS is approximately \$400-\$600 per kWh. Here's a simple breakdown: This estimation shows that while the battery itself is a significant cost, the other components collectively add up, making the total price tag substantial.
