

How to connect the battery cabinet battery

Overview

How to install UPS & battery cabinet?

1. Installation sequence is as follows: 1.1 First, determine the installation location of the UPS and battery cabinet upon arrival at the site. 1.2. Install the battery connection Wires.

How to connect a battery?

First of all, it is essential that all batteries involved are identical and have the same state of charge. Secondly, it is important to use short electrical cables, of the same length and with suitable cross-section for the connection of the batteries. Below you will find some very clear images in order to easily understand the battery connections.

How to install a battery switch?

1.2. Install the battery connection Wires. A. Determine the location of the battery switch, the positive and negative directions of the batteries in the battery cabinet, and install the air switch and terminal connectors on the battery cabinet. B. Connect the positive terminal of the battery to the air switch.

How to connect a UPS battery to a host?

F. Before connecting the battery cables from the battery cabinet to the host, measure the battery voltage with a multimeter, which should be 103.36V, and check if the positive and negative leads are correctly connected. If there is a battery box, connect the batteries in series and link them to the host as required.

2. UPS Battery Wiring Example A.
