According to the news, CATL's initial capacity of the plant is 6.9GWh, which is expected to be completed and put into operation by the end of 2026, and will be gradually expanded to 15GWh. According to foreign media reports, on June 29, the joint venture factory project of CATL in Indonesia.

CATL has laid the foundation stone for a battery cell factory in Indonesia in collaboration with its joint venture partner, Indonesia Battery Corporation. The factory in Karawang in West Java is scheduled to go into operation by the end of 2026 with an initial capacity of 6.9 gigawatt hours (GWh).

Contemporary Amperex Technology Co. Limited (CATL), the world's largest battery manufacturer, has officially broken ground on a massive battery cell factory in Indonesia, marking a significant milestone in the global battery supply chain evolution. The project, commencing construction in June 2025.

Chinese EV battery giant Contemporary Amperex Technology Co. Limited (CATL) officially broke ground on a new factory in Indonesia on June 29. The project aligns with President Prabowo Subianto's vision to establish a complete battery supply chain starting from mining and is expected to boost.

A subsidiary of CATL and local partners have begun construction on a battery

manufacturing complex in West Java, Indonesia. The world's biggest lithium-ion (Li-ion) battery manufacturer announced the start of construction at the factory. It is part of a project, which CATL said spans the "full.
