Iraq is developing a solar power project in the central desert region as part of efforts to ease chronic electricity shortages worsened by a decline in Iranian gas imports. The new plant will generate 300 megawatts of power from half a million solar panels, of which nearly 40,000 have been.

Iraq is advancing several solar power projects as part of a plan to meet its electricity needs. This aerial photo shows panels at a newly opened industrial-scale solar power plant in Karbala, Iraq, on September 17, 2025 [Anmar Khalil/AP] Iraq is set to open its first industrial-scale solar plant in.

Iraq has launched a new solar power project as part of an intensified drive to tackle a post-war electricity shortage that has been worsened by lower Iranian gas supplies. The new plant will generate 300 megawatts (MW) and involves the installation of half a million solar panels. The project is.

Baghdad (IraqiNews.com) – Iraq is set to inaugurate its first utility-scale solar power plant with a capacity of 250 megawatts (MW) by the end of the current year. Minister of Oil Hayan Abdul Ghani made the announcement today, Sunday (July 27, 2025), highlighting a significant step in the nation's.

The Iraqi Prime Minister has laid the foundation stone for the Shams Al-Basra solar power station, a landmark renewable energy project in Basra with a total generation capacity of 1,000 megawatts. Speaking at the inauguration, Mohammed Shia Al-Sudani highlighted the strategic importance of the.

Iraq is finally proceeding with the country's first big solar power plant. The Baghdad government has stepped up the effort to adopt a more environmentally sustainable energy policy that includes combining renewable energy additions and

reducing gas flaring from oil operations. French energy major.
