

# Latest on Ireland s solar energy storage policy

## Overview

---

Ireland has officially launched a procurement scheme targeting Long Duration Energy Storage (LDES), a crucial step to enhance the country's renewable energy infrastructure and secure stable electricity supplies.

Ireland has officially launched a procurement scheme targeting Long Duration Energy Storage (LDES), a crucial step to enhance the country's renewable energy infrastructure and secure stable electricity supplies.

Electricity storage, which entails capturing electricity produced at one time for future use, will be a key element in the successful operation of our electricity network and will accelerate our use of renewable electricity, providing cheaper, greener electricity to the consumer. Grid scale.

The Minister for the Environment, Climate and Communications, Eamon Ryan, received approval from the Government on 5 July 2024 for two memos, both of which can expedite the delivery of and ensure that Ireland gets the optimum benefit from our renewable energy potential. The two memos set out the.

This is the first national policy for energy storage in Ireland and as called out by Eamon Ryan, Minister for the Environment, Climate and Communications – “it is vital that Ireland exploits the full potential of electricity storage, and the publication of this policy framework is an important step.

Large energy users like data centers and manufacturers could gain expedited access to at least 500 MW of solar deemed ‘ready to proceed’ under the new, ‘more enabling’ private wires framework, said Solar Ireland CEO Ronan Power. The updated policy targets national grid congestion, particularly.

Facing challenges with renewable integration, Ireland's new scheme offers a clear path for developers needing planning permission and approval. Ireland has officially launched a procurement scheme targeting Long Duration Energy Storage (LDES), a crucial step to enhance the country's renewable.

As we prepare for a pivotal national budget, Solar Ireland has submitted a clear and timely message to government: solar energy is not just a climate solution — it's a social and economic one too. Our Budget 2026 submission outlines three

essential asks that, together, can unlock clean energy.

## Latest on Ireland's solar energy storage policy

---

### [Government publishes Electricity Storage Policy Framework](#)

The Department of Environment, Climate and Communications published the long-awaited Electricity Storage Policy Framework for Ireland on 4 July.

### [Energy storage systems and the 2030 Climate ...](#)

In order to realise its net-zero carbon emissions objective and to secure Ireland's future energy supply, the Government is committed to ...

### [Electricity Storage Policy Framework](#)

The Electricity Storage Policy Framework presents 10 government actions to support the role of electricity storage systems in Ireland's energy transition, identifying the key ...

### [Clarity on battery policy vital for Irish energy goals](#)

Bobby Smith, head of Energy Storage Ireland, highlights a critical need for clear policy and infrastructure development to ensure ...

## Energy storage systems and the 2030 Climate Action Plan targets

In order to realise its net-zero carbon emissions objective and to secure Ireland's future energy supply, the Government is committed to transitioning to an electricity-led system. ...

### [Electricity storage policy and 'private wires'](#)

Ireland has about 800MW of storage capacity, while the policy framework recommends procuring additional storage immediately. ...

### [Solar Ireland Budget 2026: Our Policy Priorities for ...](#)

As we prepare for a pivotal national budget, Solar Ireland has submitted a clear and timely message to government: solar energy is not ...

### [Government publishes Electricity Storage Policy ...](#)

The Department of Environment, Climate and Communications published the long-awaited Electricity Storage Policy Framework for ...

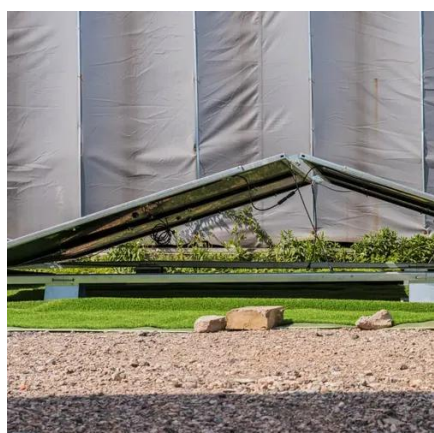

### [Ireland Powers Ahead: Energy Storage Procurement Unlocks ...](#)

Looking ahead, the government plans to refine market mechanisms to sustain and expand energy storage capacity beyond 2030, ensuring that the grid's future needs are met ...

### [Clarity on battery policy vital for Irish energy goals](#)

Bobby Smith, head of Energy Storage Ireland, highlights a critical need for clear policy and infrastructure development to ensure Ireland meets its renewable energy goals.

### [Electricity storage policy and 'private wires](#)

Ireland has about 800MW of storage capacity, while the policy framework recommends procuring additional storage immediately. Ultimately, this will provide cheaper, ...

### **Ireland's new private wire policy could unlock benefits for solar**

Solar Ireland, the lobby group representing the Irish solar industry has welcomed the State's approval for a new policy that will allow private sector companies to set up their ...

### **Unlocking the potential: Insights from industry on barriers, ...**

Using focus groups and a survey with the renewable energy and storage sector, we document perspectives on the critical barriers, innovative solutions and policy gaps identified ...

### **New Electricity Storage Policy Framework for Ireland and the ...**

In short, these policy considerations state that the publically owned National Electrical Grid is a crucial piece of national infrastructure, and changes to it or the construction ...

### **Solar Ireland Budget 2026: Our Policy Priorities for a Just, ...**

As we prepare for a pivotal national budget, Solar Ireland has submitted a clear and timely message to government: solar energy is not just a climate solution -- it's a social ...
