

# Lithuania s new energy storage industry base

## Overview

---

Trina Storage, the BESS division of solar energy firm Trinasolar, has announced deployment of three new battery storage projects in Lithuania totaling 90MW/180MWh. The installations will be located in Anyksciai, Skuodas, and Jonava, executed in partnership with EPC company.

Trina Storage, the BESS division of solar energy firm Trinasolar, has announced deployment of three new battery storage projects in Lithuania totaling 90MW/180MWh. The installations will be located in Anyksciai, Skuodas, and Jonava, executed in partnership with EPC company.

Additional funding has been approved by the Ministry of Energy and Environment to support its ongoing energy storage procurement program, following overwhelming interest from potential beneficiaries. Meanwhile, Trina Storage has secured the first 180 MWh of battery storage projects in the country.

Lithuania's Ministries of Energy and Environment have approved an additional €37 million to expand capital expenditure support for energy storage projects. This funding supplements an existing €102 million fund managed by the Environmental Project Management Agency (EPMA) during its first call.

The Ministers of Energy and the Environment in Lithuania have approved an additional €37 million (US\$43 million) for an energy storage capex grant scheme, while Trina Storage has secured orders in the country. The additional funds from the Ministry of Energy were announced last week (18 July). The.

Lithuania's Ministries of Energy and the Environment have jointly approved an additional €37 million in funding to expand the country's capital expenditure (capex) support for energy storage projects. The announcement, made on July 18, supplements an existing €102 million fund administered under.

However, energy storage projects (both electricity and heat) are so far focused on energy storage and balancing for short-term – daily or weekly periods only. Electricity sector Lithuania, Latvia and Estonia have seamlessly disconnected from the Soviet-era Russian electricity system and started.

Lithuania's energy ministry said on Tuesday it will be launching an additional

energy storage call to allocate nearly EUR 45 million (USD 52.5m) in support. Energy storage facility in Lithuania. Image source: Energy Cells. The tender will start on October 10 and will be handled by the Environmental. What is a new energy storage project in Lithuania?

The plan involves direct grants to support investments in the deployment of at least 1,200 MWh of new energy storage systems across Lithuania. The tender will be administered by the Environmental Project Management Agency (EPMA). The deadline for applications is June 17, 2025.

Why is Lithuania launching a major energy storage procurement exercise?

Only a day before cutting ties with the Russian power grid, the Baltic state announced the launch of a major energy storage procurement exercise. Lithuania has announced a EUR 102 million (\$ 105 million) energy storage tender in a bid to procure balancing services to the transmission system operator and ensure the resilience of its grid.

Which power plant provides energy storage in Lithuania?

Kruonis Pumped Storage Plant provides energy storage, averaging electrical demand throughout the day. The pumped storage plant has a capacity of 900 MW (4 units, 225 MW each). Kaunas Hydroelectric Power Plant has 100 MW of capacity and supplies about 3% of the electrical demand in Lithuania.

Will Lithuania install 800 MWh of energy storage facilities?

In the procurement exercise, Lithuania is seeking to install at least 800 MWh of energy storage facilities, which will be directly connected to the transmission network by the end of 2028.
