

# Ljubljana wind and solar energy storage power station

## Overview

---

The power station consists of three units, which went in service in 1966, 1967, and 1984, and generate 42 MW, 32 MW, and 50 MW of electric power (94 MW, 94 MW, and 152 MW of heat, respectively). The 101-metre-tall (331 ft) chimney at has a gallery that resembles an observation deck. However, it contains equipment for exhaust monitoring.

## Ljubljana wind and solar energy storage power station

### **The Bidder for Ljubljana Energy Storage Project Key Insights and**

Slovenia's capital, Ljubljana, has set an ambitious target: 70% renewable energy integration by 2030. The city's new 120 MW battery storage system will stabilize its grid as solar and wind ...
