The 162V62F module cutting-edge design enables high reliability and durability to demanding power and energy requirements for grid and industrial applications. Unmatched power density, providing exceptional performance and durability for grid applications. The 102V88F module cutting-edge design.

Kamcap supercapacitor energy storage module with protection circuit, good stability and high conversion efficiency. The voltage and capacity of the super capacitor are improved by series and parallel connection, and it has a good application prospect in the automotive field and energy storage.
