

# Madrid High Frequency Uninterruptible Power Supply

## Overview

---

An uninterruptible power supply (UPS) or uninterruptible power source is an electrical apparatus that provides emergency power to a load when the input power source or fails. A UPS differs from an auxiliary or emergency power system or standby generator in that it will provide near-instantaneous protection from input power interruptions, by supplying energy stored in batteries.

In a city like Madrid, where industries thrive on 24/7 operations, power interruptions can cost thousands per minute. Whether you're running a hospital, data center, or manufacturing plant, understanding uninterruptible power supply (UPS) pricing isn't just about numbers—it's about business survival.
