The Accelerating Renewable Energy Investments and Sustainable Energy (ARISE) project was initiated with the objective of scaling-up solar PV in Maldives by encouraging private sector investments through the creation of project structures conducive for private sector participation. These projects.

The Ministry of Finance and Planning of the Maldives is seeking a developer for the

installation of a 100 MW to 150 MW solar project. The deadline for expressions of interest is Feb. 27. The Ministry of Finance and Planning of the Maldives has kicked off a tender for installation of a large-scale. Why solar PV with storage in Maldives?

Solar PV with storage has proven suitable and competitive for Maldives' high penetration of renewable energy (POISED type B projects), with an average fuel savings of 25%. The concept design of hybrid systems (efficient diesel generators + solar PV plants + energy storage) has resulted in success for Maldives.

What is the Maldives solar project?

The Maldives solar project is a 36 MW solar power project and 50 MWh of battery energy storage solutions development across various islands in the Maldives. It also includes grid modernization for the integration of variable renewable energy with the grid, which will be financed under the proposed AIIB loan.

Should investors invest in sustainable solar projects in the Maldives?

In 2014, the first 1.5 MW solar project under ASPIRE only had four investors bids, and resulted in a high power purchase price (PPA) of 21 US cents per unit of electricity, indicating a lack of interest from investors in investing in sustainable projects in the Maldives.

Will a 5 MW solar installation make Maldives a popular destination?

Now, one of the first sights for any of the 1.7 million tourists visiting the Maldives will be that of the 5 MW solar installation on the highway linking the airport island to Male and its satellite town of Hulhumale.
