

# Middle East 13 billion energy storage project

## Overview

---

This month's news, spanning Saudi Arabia, UAE, Oman, and beyond, reveals a surge in utility-scale BESS deployments, hybrid solar-storage hybrids, and policy-driven investments totaling billions.

This month's news, spanning Saudi Arabia, UAE, Oman, and beyond, reveals a surge in utility-scale BESS deployments, hybrid solar-storage hybrids, and policy-driven investments totaling billions.

As September 2025 draws to a close, the Middle East's renewable energy storage sector is charging ahead with groundbreaking announcements, financial closes, and operational milestones that underscore the region's pivotal role in the global #EnergyTransition. With ambitious targets like Saudi.

Battery storage technology has become the cornerstone of the Middle East's ambitious energy transformation, providing essential support for grid resilience, seamless renewable energy adoption, and strengthened energy independence across the region. The Battery & Energy Storage sector at Middle East.

Chinese battery giant CATL and Masdar, the UAE's flagship renewable energy company, have announced a landmark partnership to develop the world's largest solar and battery energy storage system (BESS) project in Abu Dhabi. The collaboration, unveiled on January 17, represents a transformative step.

That's the scale of the Middle East's largest energy storage project, currently under construction in the UAE. Designed to tackle the region's infamous "sun-soaked but storage-starved" energy paradox, this initiative is rewriting the rules of renewable integration. Let's unpack why your morning.

According to The Future of Battery Market in the Middle East & Africa, Saudi Arabia plans to expand its battery storage capacity from 22 GWh to 48 GWh by 2030. The Saudi Electricity Company has awarded contracts for 10 GWh of battery energy storage systems in several locations, while a 1.3 GWh.

In 2016, the 800MW photovoltaic power generation project of the Dubai Solar Park Phase III in the United Arab Emirates was awarded at a price of 2.99 cents/kWh. In 2019, it even set a new record of USD 0.0169/kWh for a single project, which was

far lower than the global average bidding price. In.

## Middle East 13 billion energy storage project
