LZY offers large, compact, transportable, and rapidly deployable solar storage containers for reliable energy anywhere. LZY mobile solar systems integrate foldable, high-efficiency panels into standard shipping containers to generate electricity through rapid deployment generating 20-200 kWp solar.

Mobil-Grid® 500+ solarfold is a 20 Feet ISO High Cube container, with CSC certification, which integrates a plug and play pre-wired deployable and redeployable solar plant. The strong points of the Mobil Grid® 500+ solarfold: This question is for testing whether or not you are a human visitor and to.

Would you like to generate clean electricity flexibly and efficiently and earn money at the same time?

With Solarfold, you produce energy where it is needed and where it pays off. The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp.

Foldable Solar Panel Containers are an innovative solution that is combined with solar power technology and logistical convenience. The mobile solar containers carry photovoltaic panels, which can be folded and unfolded like an accordion. Such systems are designed for situations that need flexible.

That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced container.

Applicable for all sorts of refugee camps where it can produce electricity without any disturbing noise or exhaust fumes. It is often a challenging as well as costly task to deliver electricity to the irrigation pumps. Especially difficult in remote locations. Our container comes as a perfect.
