Most RV manufacturers install a “converter” into the RV’s electrical system so that your auxiliary battery will charge while you are plugged into shore power – it converts AC power to DC power. An inverter does the opposite of a converter; it transfers the DC power from your battery to AC power so.

Only install the inverter in a location that meets the following requirements: Clean and Dry – The inverter should not be installed in an area that allows dust, fumes, insects, or rodents to enter or block the inverter’s ventilation openings. This area also must be free from any risk of.
