

# New solar module project in Israel

## Overview

---

Israel has signed a concession agreement to build a new solar power facility with integrated battery storage at the Ashalim energy complex in the Negev, a project expected to add significant capacity to the national electricity grid, the Finance Ministry said Sunday.

Israel has signed a concession agreement to build a new solar power facility with integrated battery storage at the Ashalim energy complex in the Negev, a project expected to add significant capacity to the national electricity grid, the Finance Ministry said Sunday.

Israel has approved two large-scale solar projects in the Negev Desert, set to significantly enhance the country's solar energy capacity. The projects are part of Israel's broader strategy to increase its reliance on solar power and complement existing energy infrastructure. Israel's National.

Nofar Energy and Doral have signed deals in the US while Mivne is teaming with Enlight to put solar energy panels on the rooftops of its properties. On the final day of 2025, three Israeli renewable energy companies signed deals worth a combined NIS 4.5 billion. OY Nofar Energy (TASE: NOFR) has.

Israeli solar energy giant Teralight has announced the commencement of operations for the country's largest solar project, Ta'anach 1, a 150 MW solar array nestled in the picturesque Jezreel Valley of northern Israel. This groundbreaking project is poised to generate an impressive 310 GWh of clean.

Israeli independent power producer (IPP) Shikun & Binui Energy has inked a build-operate-transfer agreement with the State of Israel for the development of a 150-MW solar farm, coupled with around 460 MWh of storage. Image by: Veselina Petrova. The project will be implemented within the area of an.

The project will use photovoltaic technology combined with large-scale energy storage, allowing electricity produced during daylight hours to be supplied to the grid at night or during periods of high demand. Israel has signed a concession agreement to build a new solar power facility with.

Teralight has activated Israel's biggest PV project, the 150 MW Ta'anach 1 array,

which will produce 310 GWh of energy per year. The facility will be expanded next year with the 104 MW Ta'anach 2 installation, featuring 440 MWh of energy storage. Israeli solar developer Teralight said in a recent.
