Are you looking for uninterruptible power supply protection and management solutions?

Schneider Electric provides UPS power supply for homes, data centers and industrial environments. Our UPS power supply provides protection from power surges, load shedding and unpredictable weather conditions.

The three significant factors to consider when setting up a UPS are the intended load (i.e., the combined voltage and amperage of all connected electronics), the capacity (i.e., maximum power output), and the runtime (i.e., how long it can supply battery power for). A UPS is most. The capacity of.

An uninterruptible power supply (UPS), also known as a battery backup, provides backup power when your regular power source fails or voltage drops to an unacceptable level. A UPS allows for the safe, orderly shutdown of a computer and connected equipment. The size and design of a UPS determine how.
