

Nordic rooftop solar energy storage company

Overview

Battery Energy Storage Systems (BESS) are the perfect complement to solar energy, which is one of the most predictable and cost-efficient renewable energy sources available. By storing excess energy, BESS makes it possible to use solar power throughout the day and helps optimise grid.

Battery Energy Storage Systems (BESS) are the perfect complement to solar energy, which is one of the most predictable and cost-efficient renewable energy sources available. By storing excess energy, BESS makes it possible to use solar power throughout the day and helps optimise grid.

The largest PV rooftop plant in the Nordics has been completed with 24.000 panels spanning 100,000 sqm. The project feeds the DSV's 175,000 sqm logistic center in Landskrona, Sweden, with renewable energy. The project utilizes 34 units of Sungrow's SG350HX string inverter. LANDSKRONA, Sweden, Jan.

This solar park consists of 24,000 PV modules with a total power of 14 MWDC, installed on the two roofs of a warehouse covering 175,000 m² of storage space. Each 590W solar panel faces east and west. The SG350HX inverter is certified to meet all current EU requirements, is built to handle even the.

A groundbreaking solar energy project has been completed in Sweden, marking a significant milestone in the adoption of renewable energy production across the Nordic region. The massive installation, located at DSV's 175,000-square-meter logistics center in Landskrona, features 24,000 solar panels.

On February 17, 2025, the world leader in solar inverters and energy storage systems, Sungrow, announced its participation in the largest photovoltaic rooftop installation in the Nordic countries. Located at DSV's logistics center in Landskrona, Sweden, this ambitious project includes a staggering.

In the city of Landskrona, Sweden, DSV's logistics centre has become the epicentre of the Nordic countries' energy transition, with the largest photovoltaic installation in the region. The company Sungrow, specialising in photovoltaic inverters and energy storage, played a key role in this.
