

# Ottawa solar container energy storage system

## Overview

---

Although energy storage comes in different shapes and sizes, the lithium-ion Battery Energy Storage System (“BESS”) is the fastest emerging technology in North America and is planned to be deployed in the City of Ottawa with the Ottawa BESS 2 Project.

Although energy storage comes in different shapes and sizes, the lithium-ion Battery Energy Storage System (“BESS”) is the fastest emerging technology in North America and is planned to be deployed in the City of Ottawa with the Ottawa BESS 2 Project.

Ottawa BESS 2 is a proposed up to 75 Mega-Watt (“MW”) lithium-ion Battery Energy Storage System (“BESS”) that will be located at 2393 8th Line Road, Ottawa, ON, K0A 2P0. The Project will be submitted to the Independent Electricity System Operator’s (“IESO”) Request for Proposals under the Long-Term.

The battery storage project alongside the six solar projects Council supported earlier this fall will reduce the city’s reliance on expensive gas-fired electricity during peak demand and strengthen Ottawa’s ability to meet its climate and energy commitments. “This is Ottawa’s largest-ever battery.

In 2025, the City of Ottawa established official plan and zoning provisions for battery energy storage uses in accordance with new Official Plan policy. BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge.

Workers check battery storage pods at a lithium-ion battery storage energy facility in Arizona last year. Ottawa is looking at regulatory changes around these types of facilities. (Ross D. Franklin/The Associated Press) UPDATED: City councillors unanimously approved the new rules for battery energy.

In 2025, the City of Ottawa established official plan and zoning provisions for battery energy storage uses in accordance with new Official Plan policy. BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge.

Range of MWh: we offer 20, 30 and 40-foot container sizes to provide an energy

capacity range of 1.0 – 2.9 MWh per container to meet all levels of energy storage demands. Optimized price performance for every usage scenario: customized design to offer both competitive up-front cost and lowest.
