Electric double layer capacitors and supercapacitors are a class of electrolytic (polarized) capacitors that offer exceptionally high capacitance values in relation to their physical size and low voltage ratings; individual devices have ratings of a few volts at most, though products incorporating.

Electric double-layer capacitors also known as supercapacitors or ultra capacitors are charge storage devices for electrical energy. The formation of an electric double-layer capacitor is composed of carbon electrodes or derivatives of higher

electrostatic double-layer capacitance, an electrolyte.
