Solar panels generate "free" electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

Generate your own clean energy from the sun for free with solar. Add Powerwall to store your energy for use anytime you need it. Flexible financing and low monthly lease options can help you secure the best price for your solar system. By installing solar panels, you can also reduce your reliance.

A glass solar panel typically costs between \$0.50 and \$1.00 per watt, making the average installation of a residential system vary from \$15,000 to \$30,000 depending on the capacity and type of the system, location, and installation costs.

This expense includes the price of materials, labor, and.
