

Prices of solar modules in New York USA

Overview

As of December 2025, the average solar panel system costs \$2.79/W including installation in New York. For a 12.19 kW system (the average system size in New York), this comes out to about \$34,035 before any available incentives, though prices range from \$28,930 to \$39,140.

As of December 2025, the average solar panel system costs \$2.79/W including installation in New York. For a 12.19 kW system (the average system size in New York), this comes out to about \$34,035 before any available incentives, though prices range from \$28,930 to \$39,140.

You'll pay an average of \$34,035 to install a 12.19 kilowatt (kW) solar panel system in New York before any available incentives. Solar panels typically last 25-30 years, generating free electricity and protecting you from rising utility rates for decades. The average New York homeowner will save.

For homeowners in New York, the average cost for a professionally installed residential rooftop solar system typically ranges from \$19,000 to \$35,000 before any tax credits or incentives are applied. This guide will provide a comprehensive breakdown of what that investment includes, the key factors.

New York homeowners are increasingly choosing solar energy, and the reasons are clear. With electricity prices 47% higher than the national average and rates climbing 33% since 2020, solar panels for your home offer a path to long-term energy savings and independence. This guide covers everything.

The cost of solar panels typically starts at \$20,000. Thanks to the federal 30% tax credit and NY State rebates, your final cost can be much lower, and long-term savings can exceed \$100,000. These are great numbers to look at, but what does it really mean?

Here's a full solar panel cost breakdown.

In New York, the average home requires a 7.5 kW solar system to meet household electricity demand. In 2025, the average solar panel cost in the state is about \$3.30 per watt, making a typical system cost around \$24,750 before incentives. With the 30% federal Investment Tax Credit (ITC), the net.

We go over average solar pricing in New York City. Currently, the national average cost of solar panels is \$2.66 per watt. However, in New York City, the typical cost of solar panels is 4 per watt. The average New York City homeowner needs a 3.9-kilowatt system, which would cost about \$9,951 with. How much do solar panels cost in New York?

As of January 2025, the average solar panel system costs \$2.92/W including installation in New York. For a 5 kW installation, this comes out to about \$14,608 before incentives, though prices range from \$12,417 to \$16,799. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.

How much does a solar system cost?

This is higher than the average price of residential solar power systems across the United States, which is currently \$3.00 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations typically have a lower cost per watt because the panels can be purchased at a 'bulk price.'

How much does a 10 kW solar system cost?

It costs \$36,500 for a 10-kW solar system after the ITC is applied. Broadly speaking, the cost is about \$18,250 for a 5-kW system. Other solar equipment, higher quality panels, or above-average energy needs will increase the cost. Conversely, a smaller solar panel system or less efficient solar panels will decrease the cost.

Is investing in solar panels worth it in New York?

According to feedback from over 500 solar energy customers in New York, solar panel investments pay off over time in the state. New York's decent amount of sunlight and relatively solar-friendly policies make it one of the best states for solar panels.
