

Pristina High Temperature Solar System

Overview

At its core is a solar thermal plant with 63,000 m² of collector area, which will deliver an additional 50 MW of thermal output to six rapidly growing urban districts: Tophane, Kalabri, Lakrishtë, Mahalle e Muhaxherëve, Gjinaj South, and Old Prishtina.

At its core is a solar thermal plant with 63,000 m² of collector area, which will deliver an additional 50 MW of thermal output to six rapidly growing urban districts: Tophane, Kalabri, Lakrishtë, Mahalle e Muhaxherëve, Gjinaj South, and Old Prishtina.

The European Commission, the KfW banking group and the European Bank for Reconstruction and Development (EBRD) together with a local contribution will provide the investment costs for the multi-megawatt Big Solar Prishtina plant. It is planned to include a 40.6 MW solar collector field together with.

District heating utility Termokos is seeking a contractor to build a 30 MW solar thermal facility outside Prishtina in Kosovo*. The estimated time for completion is 30 months plus a six-month commissioning phase. After several years of preparation, Kosovo* is moving ahead with the largest solar.

POE “Termokos” presented today the final results of the pre-feasibility project for solar energy “Solar Energy for Kosovo / Large Solar Plants of Prishtina”. This project implemented thanks to German-Kosovar cooperation, through the German Development Bank (KfW) and the European Bank for.

BigSolar Prishtina will have an impressive 40.6 MW (about 58.000m²) solar collector field together with a seasonal storage of 400.000 m³. SOLID is part of the consulting consortium. SOLID is partner in the consortium of the project “Consulting for the implementation of the project Solar4Kosovo II –.

With the Solar 4Kosovo II project, the city of Prishtina is taking a major step toward a climate-friendly future. In May, the master plan for this forward-looking district heating initiative was presented—a joint effort involving the municipality, international partners, and our expertise as part of.

Pristina is taking a monumental step towards a sustainable future with the

finalization of an agreement worth over €80 million for a new solar heating plant. The deal, signed by Kosovo's Ministry of Finance and the district heating company Termokosi, and backed by the European Bank for.
