

# Recommended solar container for medical use in West Africa

## Overview

---

SophiA will develop and locally manufacture innovative, modular, flexible, affordable and efficient solar containers to provide the local population with: Safe, clean drinking water and deionised water for medical purposes. Hot water and steam production for hospital thermal.

SophiA will develop and locally manufacture innovative, modular, flexible, affordable and efficient solar containers to provide the local population with: Safe, clean drinking water and deionised water for medical purposes. Hot water and steam production for hospital thermal.

SophiA enables African countries to pursue sustainable pathways of development through a low-carbon, climate resilient and green growth trajectory, leapfrogging fossil fuels and high global warming potential refrigerant technologies. SophiA will enable a growing number of African populations to.

Enter solar-powered BESS container medical logistics – the unsung hero. These 100kWh mobile units, funded by Gavi Alliance, maintain  $\pm 0.5^{\circ}\text{C}$  precision in refrigerated trucks, outlasting traditional systems with 12-day off-grid operation. One unit serves 500 remote clinics, slashing spoilage by 95%.

health centres equipped with solar PV systems since 2017. Health facilities need power. Clinics, maternity wards, operating rooms, medical warehouses, and laboratories rely on electricity to power the lights, refrigerate vaccines, and operate life-saving medical devices. An inability to carry out.

ISO/TUV/CE-certified units deliver rapid-deploy solar power for off-grid, emergency, and mobile applications, reducing emissions by 70% vs diesel. Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity.

Our solar-powered systems ensure uninterrupted operation of life-saving equipment, such as oxygen concentrators, incubators, surgical lights, and diagnostic tools, improving patient outcomes in remote areas. We transform healthcare access by equipping clinics with off-grid solar systems. These.

Key Figures & Findings: The West Africa Container Terminal (WACT)-APM Terminals Nigeria has donated and commissioned solar power systems for two primary healthcare centers in Rivers State, specifically in Onne and Ogu. This initiative is part of the company's corporate social responsibility (CSR).
