

# Romanian large energy storage company

## Overview

---

Nova is currently the national leader in energy storage capacity, with 240 MWh already operational. The company is also heavily investing in electricity generation facilities, including both renewable and gas-fired power plants.

Nova is currently the national leader in energy storage capacity, with 240 MWh already operational. The company is also heavily investing in electricity generation facilities, including both renewable and gas-fired power plants.

Bucharest, July 22, 2025 – Nova Power & Gas, a Romanian energy company and part of the E-INFRA Group, announces the launch of the largest battery energy storage project in Romania. The installation, which will be built in Florești, Cluj County, will have a capacity of 200 MW / 400 MWh and is.

Enterprising companies in Romania's energy storage market have expansion, with recent announcements from two major players, Nova Power & Gas and Visual Fan, set to add over 580 MWh of battery capacity to the grid. The investment wave, supported by key regulatory changes, is elevating Romania in the.

Nova Power & Gas, part of the E-INFRA Group, has announced the commissioning and start of commercial operations of the largest battery energy storage system (BESS) in Romania. The facility, located in Florești, Cluj County, has an installed power of 200 MW and a storage capacity of 400 MWh. At the.

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities. The group includes R.Power, Hidroelectrica, Engie and more big names. Recent updates about investments in battery energy storage.

A subsidiary of Nova Power and Gas, part of the E-INFRA group, is on track to secure authorization for the construction of Romania's largest energy storage facility in Florești, Cluj. With an installed capacity of 200 MW and a storage capacity of 405 MWh, this project will enhance the country's.

PRIME is a prominent manufacturer of advanced energy storage solutions, focusing on Lithium-ion batteries and customized battery packs. Their commitment to innovative technologies and sustainable practices positions them as a key player in

the energy storage industry, providing cost-effective and. Where is the largest battery energy storage system in Romania?

Nova Power & Gas, part of the E-INFRA Group, has announced the commissioning and start of commercial operations of the largest battery energy storage system (BESS) in Romania. The facility, located in Florești, Cluj County, has an installed power of 200 MW and a storage capacity of 400 MWh.

What is Romania's largest battery project?

Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date. The company will build a 400 MWh facility in Florești, Cluj county, which is expected to be operational by the end of 2025.

Is battery energy storage a pillar of Romania's energy transition?

Recent updates about investments in battery energy storage systems (BESS) in Romania indicate the technology is becoming another pillar of the country's energy transition alongside wind power. For several years now, photovoltaics, and prosumers in particular – including municipal authorities, have dominated the scene.

Which companies are combining Bess with solar power in Romania?

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities. The group includes R.Power, Hidroelectrică, Engie and more big names.
