Bottom Line on 100-Watt Solar Panels
The truth is this: 100-watt solar panels are very much an "entry-level" product for small-scale applications. Even under full sun for an ordinary summer day, they won't generate a ton of usable electricity. That said, if you need a super portable solar panel that is easy to use for charging a small portable solar power station, you can't go wrong w See more on solarreviews
